

The Arthrogyrosis Group (TAG)

presents

The International TAG Weekend & Conference 2007

21st to 23rd September

Paramount Hinckley Island Hotel, Leicestershire

International Speakers to include:

Johannes Correll - Consultant Paediatric Orthopaedic Surgeon (Germany)

Judith Hall - Professor of Paediatrics and Medical Genetics (Canada)

Eva Kimber - Consultant Paediatric Neurologist (Sweden)

Ulrich Mennen - Professor of Hand Surgery (South Africa)

Lynn Staheli - Consultant Paediatric Orthopaedic Surgeon (America)

Who is the TAG Weekend and Conference for?

This is an event for adults and children with Arthrogyrosis, and their families, where they can learn more about AMC from some of the world's most experienced specialists. It is also an opportunity to make friends with others in a similar situation, to share experiences and to exchange information. There will be a crèche and a full programme of activities for children.

What is Arthrogyrosis?

Arthrogyrosis Multiplex Congenita (AMC) is the name given to a group of rare congenital disorders which result in deformity and stiffness of the joints. The condition has diverse symptoms that give rise to varying degrees of physical disability.

For more information about the Conference, AMC and TAG:

Tel: 01299 825781 - Email: taguk@aol.com - Website: www.tagonline.org.uk

Also, for doctors and therapists working with people with AMC:

The First International Symposium on Arthrogyrosis
Birmingham City Council Chambers, UK - 20th & 21st September 2007

Speakers include:

- The International specialists listed above
- Some of the UK's leading specialists
